

# Recycle the “White Stuff”

*As a service to you, we offer to recycle your scrap expanded polystyrene. In order to qualify for this service, the following guidelines must be met:*

- You must request a scrap PU when placing your order. We will let you know if it is possible to schedule that with your delivery. We prefer to pick up your recycling materials when you have accumulated **a half or full truckload** to send back to our facility (30-60 bags).
- All scrap EPS must be in **CLEAR** poly bags, 72" x 78". No oversize or small bags will be accepted. All bags **MUST** be tied shut with a single knot. **DO NOT** overfill or tape bags closed. Boxed material cannot be accepted. Our driver must be able to see through the bag to examine it while it is being loaded on our truck. As a convenience for our customers, we inventory Gaylord bags which may be purchased by the roll *at cost*. Please inquire about current pricing.
- ⊘ Wet bags or material **cannot** be accepted. The outside of the bags cannot be dirty.
- ⊘ **Scrap EPS may not be contaminated with any other product** or any other types of foam i.e. pink, gray, green, blue or soft foams. **NO** floor sweepings, used cups, food containers, cigarette butts, tape, labels, glue, dirt, soda cans, corrugated, paper, concrete, garbage, nails, etc. Material **MUST** be **CLEAN!!** Any contamination can result in malfunctioning machinery and possible injury to our operators.
- All bags **MUST** have your company name either written on with black magic marker or a label.
- Any material that must be sorted and/or disposed of in a landfill will be invoiced accordingly.

Our operators have been instructed not to load any material onto our trucks that does not meet the above guidelines. Failure to comply with the above is a safety hazard for employees, risks equipment damage and may cause termination of scrap removal services.

Thank you for your business and cooperation in this matter. If you have any questions, please feel free to contact ICA customer service.

*eps...*
